OBJECTIVE

I am interested in getting work experience in the media and in TV. I have been interested in film making since i was a child, and have been writing scripts, and making my own short movies since i was about 6. I like planning events and have organised buses to concerts, but I would like to work my way up in the future to start organizing events and planning events. I am a sociable person and a good team player. I am a enthusiastic hard worker and always try my best to get the job done as well as i can. I am confident and happy to work. I am a good seller and I am good at talking people into buying things and doing things.

I have good experience in editing on a lot of different software's, being a camera man and doing camera work, and writing my own stories and movies. I have good communication skills and would like some on the job experience to find out more about what i would like to do.
